MEMORANDUM

TO:	Vice President of Sales
FROM:	Sales Operations Manager
DATE:	April 10, 2026
SUBJECT:	**Q1 2026 Distributor Performance Review for the Vice President of Sales**

Executive Summary

This memo provides the Vice President of Sales with the Q1 2026 distributor performance review for the May leadership meeting.

Caldwell Distribution Group ranked #1 in Q1 2026 with a composite performance score of 63.0, ahead of Whitfield Industrial Supply at 54.8 and Pemberton Wholesale Partners at 52.4. Marquette Distribution Co (41.2), Rampart Trade Services (37.4), and Devereaux Wholesale (34.1) rounded out the portfolio. Top-2 distributor concentration sits at 44.5% of the portfolio (Caldwell + Whitfield combined recurring sales of $1,882,800 against a $4,233,800 total), applying the recurring revenue rule that excludes Caldwell's $50,000 one-time bulk order from a closed account.
The Q1 2026 tier mix is 2 Premier (Caldwell, Whitfield), 0 Standard, and 4 Watch (Pemberton, Marquette, Rampart, Devereaux). No tier movement between Q1 2025 and Q1 2026 for any distributor: the four Watch accounts in Q1 2026 were also Watch in Q1 2025, and the two Premier accounts held that tier in both periods. The persistence is the headline. None of the four Watch accounts cleared the auto-Watch overrides this quarter (margin below 6.5% for Rampart and Devereaux, stock turn close-snapshot below 5.0 for Pemberton and Marquette).

Distributor Ranking and Tier Classification

Rank	Distributor	Region	Recurring Sales	Composite	Q1 2026 Tier	Movement
1	Caldwell Distribution Group	East	$991,200	63.0	Premier	None
2	Whitfield Industrial Supply	Central	$891,600	54.8	Premier	None
3	Pemberton Wholesale Partners	East	$738,500	52.4	Watch	None
4	Marquette Distribution Co	West	$658,400	41.2	Watch	None
5	Rampart Trade Services	Central	$497,300	37.4	Watch	None
6	Devereaux Wholesale	West	$456,800	34.1	Watch	None

Top-2 distributor concentration: **44.5%** (Caldwell + Whitfield).

13-Week Close Volume Picture

Three observations stand out from the weekly close volume tracking, all worth flagging before the May leadership meeting.

Portfolio leadership is concentrated. Caldwell led portfolio weekly close volume in all 13 weeks of Q1, building from $70,500 in W/E Jan 4 to a peak of $86,500 in W/E Mar 22 before easing to $77,600 in the final week. Whitfield ranked #2 from W/E Jan 11 onward (12 of 13 weeks); Pemberton was #2 in W/E Jan 4 only ($54,000 versus Whitfield's $53,500). Whitfield then took over the #2 slot the following week and held it for the rest of the quarter.

Three weekly close volume crossings between distributors. These rank-shifts are useful tells of changing demand patterns:

#	Week Transition	Crossing	Magnitude
1	W/E Jan 4 to W/E Jan 11	Whitfield passes Pemberton (Whitfield +$400 vs Pemberton + $500 prior)	**$900 swing**
2	W/E Feb 15 to W/E Feb 22	Devereaux passes Rampart (Devereaux +$200 vs Rampart + $1,300 prior)	**$1,500 swing**
3	W/E Mar 15 to W/E Mar 22	Marquette passes Pemberton (Marquette +$1,400 vs Pemberton +$2,300 prior)	**$3,700 swing**

Sustained patterns of risk and strength. Pemberton showed eight consecutive weekly declines after the Feb 1 peak of $62,500, falling to $47,200 in W/E Mar 29. That is a sustained sell-through problem in the East region, not a one-week miss. Rampart's weekly close volume declined from $42,800 in W/E Jan 4 through W/E Mar 8 (nine straight weekly declines to $35,200), then flattened in the high $35K's through quarter-end at $35,900 in W/E Mar 29. On the strength side, Marquette posted multi-week sequential growth from $44,600 in W/E Jan 4 to $53,700 in W/E Mar 22 (a demand build of approximately 20%) before a modest dip to $50,500 in the final week. Devereaux posted nine straight weekly increases over W/E Jan 4 through W/E Mar 8 ($29,900 to $37,900), peaking at $38,700 in W/E Mar 22. The growth signal at Marquette and Devereaux complicates the standard Watch-tier remediation script: both deserve margin-focused remediation rather than a volume reduction.

Q2 2026 Recommended Actions

Each recommendation reflects the methodology's tier-to-action mapping and references the distributor's specific Q1 weekly close volume behavior.

Caldwell Distribution Group | Tier: Premier | Action: Volume expansion
Increase SKU allocation and fund Q2 co-marketing investment. Caldwell led portfolio weekly close volume in all 13 weeks of Q1 2026, with weekly volume building from $70,500 in W/E Jan 4 to a peak of $86,500 in W/E Mar 22 before easing to $77,600 in the final week. The leadership position is durable, not a one-off.

Whitfield Industrial Supply | Tier: Premier | Action: Volume expansion
Increase SKU allocation and pursue co-marketing in the Central region. Whitfield ranked #2 in portfolio weekly close volume from W/E Jan 11 onward (12 of 13 weeks), building from $53,500 in W/E Jan 4 to a peak of $76,800 in W/E Mar 22 before a sharp final-week dip to $61,800. Worth a check on the final-week dip before increasing committed volume.

Pemberton Wholesale Partners | Tier: Watch | Action: Remediation
Terms review and 90-day performance plan with re-assessment at end of Q2. Pemberton's weekly close volume showed eight consecutive weekly declines following the Feb 1 peak of $62,500, falling to $47,200 by W/E Mar 29. The full Feb-to-March trajectory points to a sustained sell-through problem in the East region, not a one-week miss.

Marquette Distribution Co | Tier: Watch | Action: Remediation
Terms review and 90-day performance plan focused on margin recovery (margin trailing the methodology threshold). Despite the tier classification, Marquette's weekly close volume showed multi-week sequential growth, rising from $44,600 in W/E Jan 4 to $53,700 in W/E Mar 22 (a demand build of approximately 20%), with a modest pullback to $50,500 in the final week. The growth signal supports the remediation direction and a margin-focused workplan rather than a volume reduction.

Rampart Trade Services | Tier: Watch | Action: Remediation
Terms review and 90-day performance plan with margin remediation as the primary lever. Rampart's weekly close volume showed sustained decline from the W/E Jan 4 starting value of $42,800 through W/E Mar 8 (nine straight weekly declines to $35,200), then flattened in the high $35K's through quarter-end ($35,900 in W/E Mar 29). The weak demand picture combines with the sub-threshold margin to make this the highest-risk Watch account.

Devereaux Wholesale | Tier: Watch | Action: Remediation
Terms review and 90-day performance plan; primary driver is sub-threshold margin (6.4% versus the 6.5% floor). The volume picture is constructive: Devereaux's weekly close volume rose from $29,900 in W/E Jan 4 to a late-Q1 peak of $38,700 in W/E Mar 22 (nine straight weekly increases over W/E Jan 4 through W/E Mar 8). The remediation should be margin-focused rather than volume-focused.

Bottom-Line Takeaway

For the Vice President of Sales: two of the four Watch accounts (Marquette and Devereaux) are sending growth signals at the weekly level and should be remediated on margin rather than reduced on volume. Two (Pemberton and Rampart) are sending weak demand signals on top of the existing override triggers and warrant the most attention in the May leadership meeting. Caldwell and Whitfield are durable Premier accounts with room for additional SKU allocation in Q2; Whitfield's final-week dip is the only signal that argues for a brief check before committing more volume. Top-2 concentration at 44.5% is high but defensible given the tier strength of the two anchors.
